This game is a must have for all the retrojunkies and arcade fans around. The soundtrack is superb, and everything feels neat and polished. The camera system has been wisely studied to add a lot to the action. Visuals are excellent: the choice of colours and effects is THE retro eyecandy you always looked for. The pace is fast but not insane (at least in the arcade mode), so the game is suitable for casual gamers also. Using a gamepad is definitely recommended. Endless mode is dope. Purchase it and love it <3. Cool game! Great graphics! Sent all crew members over the asteroid during tutorial! Would send them to their deaths again! lol :-)) 10V10. Aero's Quest is one of those games that you need to get into it to totally appreciate it. In the very first beginning I was skeptical and I was thinking for the worse. Then, after the tutorial, the game hooked me and I found it very entertaining. The graphics are simple but not outdated with some nice touch here and there. The sound is beautiful, I'm a musician myself and I love all the tracks of the game. Mechanics are simple but are working well and generally the game, despite the challenge, hooks you up. . I have mixed feelings about this game, having just played it start to finish on "normal".

It has many of the elements necessary for a good sci-fi squad-level tactical game. The strategic game is entertaining -- you always feel like you're short on something. Base management, research, and manufacturing is cleanly done.

The tactical game is poorly developed. The first few missions are nearly identical, and overall the challenge is to find a good place to stand while the bad guys charge at you. There's a wide variety of armor, most of which you won't have a use for. It seems like they tried to accommodate a wide variety of play styles, but the tactical game isn't really deep enough to warrant more than stand-here-shoot-there.

Overall it was interesting enough that I wanted to get to the end, but I have zero interest in playing it again. If you're interested in squad-level strategy games it's worth a look, but there are better options out there.. I purchased this game for my Xbox One X the day it was released. After a week I got a refund for the \$74.99. Too much to spend on a game that doesn't work or is not complete. I have to say, the PC version is way more polished than the Xbox One. Still many of the same issues exist, but the gameplay is smoother. I even streamed TWT to YouTube last night. Was fun and at 720p 60fps. But no doubt this game still needs work PC or not. Not TopSpin4 by any means, not yet... I say not yet because after playing the game on both the console and now the PC for \$39.99 :D I do feel if they stay on top of things and keep pushing out great updates this game has the potential to become one of the best! Yes, just like TopSpin4. But we must be patient grasshoppers. Rome was not built over night. Your tennis game is not going anywhere. Especially for \$39.99. Grab it now! They heard our cries and have released a few posts in Facebook that sound very promising. I suggest you go there and follow Tennis World Tour.

Fun casual game. Just wish that there were more dinos and that they would eat people if they got loose. :). Greaaaattttt!! Fun and quite challenging at times. I played a similar game on the PS3 and absolutely fell in love with that version, my friends would come over just to help complete levels. While this version didn't have quite the same impact on me, the gameplay is on par and I would highly recommend picking up this version if a good challenge appeals to you.. You play a pair of highway patrolmen with speech impediment who are possibly autistic or otherwise have special needs. The game plays more akin to Driv3r or a little bit like Need for Speed Underground rather than something like Burnout or Flatout.

Overall I'd say 3/5 – get it for cheap and enjoy it if you like fun driving games.

The good:

- I think it looks beautiful and the city design is fun and immersive
- Driving while not super realistic is a lot of fun
- Kind of cool cop things to do like shoot cars and release RC bomb robots
- Solid brainless fun

The bad:

- Mini-map and check points frequent all you can eat♥♥♥♥♥♥buffets
- OMG that voice acting
- Crashes feel like hard rubber slapping together and don't really add anything
- Many open ended aspects of the game are not well laid out

Other thoughts:

- Driving sometimes feels a bit plasticity but it's not necessarily a bad thing – just more of an arcade feel than a sim feel.
- It's obviously a European city with all European signs and♥♥♥♥♥♥so if you speak European maybe you'd get more Easter eggs out of it.

. All of the lego games are classic, but if you play too many of them, they start feeling the same. Though you can't go wrong with Pirates.
